

## **PRESS RELEASE**

Jackon GmbH has commissioned its production facility of **LOWLA** on 2 April 2009.

**LOWLA** is the new generation expandable Polystyrene (EPS) grade with significantly enhanced insulation values, targeting the growing EPS low lambda segment in the Construction Sector. The **LOWLA** production launch facilitates in total 40.000 MT capacity.

Jackon GmbH started the first production of white EPS (Expandable Polystyrene) in 2001. Since then, several capacity extensions have been executed reaching a current capacity of 80.000 MT.
